Subject: ISSUES that require CONSIDERATION
Importance: High

1) Signalling Interworking Issue.
yet in terms of investigation in t

STP migrations must be performed as soon as possible.

2) HLR dimensioning.

3) BSCs more than 1020

4) Transits issue with respect to NRSP

must be performed as soon as the switch is ready.
functionality migration. STP capacity will be required

ODNP has to be revisited in [REDACTED]

Group on 31st of March is considered very tight.

[REDACTED] currently observed traffic profile appears to be greater [REDACTED] the possibility there is to upgrade to [REDACTED]. The increased profile might even [REDACTED] than the calculated figure requirements [REDACTED]

6) 2G Capacity Planning issues. In a number of rural areas [REDACTED]

[REDACTED] and a radio initiative is expected. (K.Tenne)

7) [REDACTED] MSC replacements to [REDACTED] architecture will take time and are too many to happen in the next FY. Overall long term plan needs to be revisited. [REDACTED]

8) Overall, traffic is increasing rapidly, subscribers also. [REDACTED] during the last 4-5 months). [REDACTED]

9) CU to CU promo traffic [REDACTED] forecasts are completely [REDACTED]

[REDACTED] BEAMS etc anticipated.

Most important issues: (Network wise)

- Signalling Interworking
- TRANSIT switches capacity
- MGW in 3G
